	Market Data Revenues as a proportion of total Revenues (%)		23%
Article 89(2)(e) of Delegated Regulation (EU) No 2017/565 and Article 11(2)(e) of Delegated Regulation (EU) No 2017/567	<p>Information on cost accounting methodology: year 2023</p> <p>Information on how the price was set, including the cost accounting methodologies used and information about the specific principles according to which direct and variable joint costs are allocated and fixed joint costs are apportioned</p> <p>Information on how the price was set, including the cost accounting methodologies used: In principle, Wiener Börse AG sets the prices of its market data based on the costs of creating and distributing them. All processes involved are recorded across departments and credited proportionately to the market data distribution. On the one hand, this includes directly attributable costs, on the other hand also overhead costs, which are used by several lines of business. In addition, appropriate shares of the general operating costs (e.g., office infrastructure) are also recorded.</p> <p>The cost-covering price for the entire area of market data sales was determined based on the total costs calculated this way.</p> <p>Based on these costs, the Wiener Börse AG determined the prices per data package.</p> <p><i>Please provide a summary of how the price was set, including:</i></p> <p><i>1) An exhaustive list of types of costs included in setting the price, including direct and joint and common costs and examples of each cost type.</i></p> <p><i>2) Allocation principles and allocation keys (%) for joint and common costs.</i></p> <p>I. Direct Costs:</p> <p>i. Personnel expenses: Employees of operating department</p> <p>ii. Depreciation: Depreciation of <i>hard- and software</i></p> <p>iii. Material Costs: <i>Maintenance of hard – and software</i></p> <p>II. Joint-Costs (33%):</p>		

		<p>i. Personnel expenses: Employees of other operating departments ii. Depreciation: Depreciation of <i>hard- and software</i> iii. Material Costs: <i>Maintenance of hard – and software</i></p> <p>III. Common Costs (25%): i. Personnel expenses: Employees of supporting departments ii. Depreciation: Depreciation of <i>office equipment and software</i> iii. Material Costs: <i>Maintenance and Licensing costs for Office equipment, rents, marketing expenses</i></p> <p><i>3) An explanation of any margin used in setting the price and how it is ensured that such margin is reasonable.</i></p> <p>Explanation: Wiener Börse AG uses a profit margin as surcharge on the costs per data package calculated as described above. The used profit margin is based on the general profit margin of the company. The reasonability of the range is defined by direct comparability with other areas within the Wiener Börse AG.</p> <p>The profit margin is checked at least annually and actively managed by Wiener Börse AG.</p>
